Professional Summary

Final-year B.Tech Information Technology student with hands-on experience in backend and full-stack development. Skilled in designing secure RESTful APIs, building scalable web applications, and developing real-time data dashboards. Strong foundation in data structures, database design, and system architecture. Seeking an entry-level Software Engineer role to build efficient, production-ready systems.

Education

Sri Sairam Institute of Technology <i>B.Tech in Information Technology (CGPA: 8.02/10)</i>	2022 – 2026 <i>Chennai</i>
St. Marks Matriculation Hr. Sec. School <i>Higher Secondary – Mathematics & Computer Science</i>	2020 – 2022 <i>Chennai</i>

Experience

Chennai Unified Metropolitan Transport Authority (CUMTA) <i>Web Development Intern</i>	Jun 2024 – Sep 2024 <i>Chennai</i>
--	--

- Developed real-time dashboards to monitor vehicular movement and transport analytics, improving operational visibility for internal teams.
- Designed and integrated RESTful APIs using Python Flask to process and serve live transport data.
- Implemented secure role-based authentication and authorization, enhancing system access control.
- Built responsive front-end interfaces using React.js and Bootstrap, improving usability across devices.
- Optimized database queries to improve dashboard data retrieval performance.

Projects

QR-Based Pavilion Tracking System Next.js, MongoDB	National Event Deployment
---	----------------------------------

- Engineered a real-time tracking system managing 15,000+ attendees across 14 zones during a large-scale event.
- Implemented automated access control logic based on dynamic occupancy thresholds to prevent overcrowding.
- Developed analytics dashboards to monitor crowd flow, zone capacity, and live utilization metrics.
- Designed scalable backend APIs to handle concurrent QR validation requests.

Intelligent Road Safety System Python, YOLOv8, Twilio API	2024
--	-------------

- Built an AI-based accident detection system using YOLOv8 for real-time CCTV video analysis.
- Integrated automated emergency alert notifications using Twilio API to reduce response time.
- Improved detection accuracy through model tuning and threshold optimization.

Technical Skills

Languages: Java, Python, JavaScript

Frontend: React.js, Next.js, HTML, CSS, Bootstrap

Backend: Flask, RESTful APIs

Databases: MongoDB, MySQL, PostgreSQL

Tools: Git, GitHub, Postman, VS Code

Core Concepts: Data Structures & Algorithms, OOPS, DBMS
